-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ficco et al. (US Pub. No. 2002/0054750) in view of Adolph et al. (US Pat. No. 6,758,540).

1. Consider claim 1. Ficco et al. teaches a method of generating and displaying in a remote display device indicia representative of a user command, or status information associated with a playback or recorder device (pg. 2, para. 0038), with a plurality of digitally encoded pictures that are decoded by the display device (pg. 5, para. 0066; figs. 3 and 5), the method comprising the steps of: receiving a digitally encoded video signal having a plurality of pictures (pg. 5, para. 0072); generating a digitally encoded indicia representing the user command or status information; modifying at least one picture from the plurality of pictures by replacing at least a portion of the picture with the digitally encoded indicia such that the indicia can be decoded and displayed when the picture is decoded and displayed by the remote display device; and transmitting the digitally encoded video signal including the modified picture to the display device (pg. 8, para. 0098; figs. 10a-10c, 11a, 11b, 12e, 13a, and 13b).

Ficco et al. does not teach that at least a portion of the digitally encoded indicia comprises intra macroblocks.

However, Adolph et al. discloses that at least a portion of the digitally encoded indicia comprises intra macroblocks (abstract; col. 1, lines 49-52; col. 4, lines 37-41).

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to use, for at a portion of the digitally encoded indicia to comprise intra macroblocks, in order to reduce hardware and required memory capacity.

2. Consider claim 13. Adolph et al. teaches the apparatus according to claim 12, wherein the digitally encoded indicia is MPEG encoded (abstract).

Art Unit: 2621

3. Apparatus claim 12 is rejected for the same reason as discussed in the corresponding method claim above.

Allowable Subject Matter

4. Claims 2-11 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
